Profile

Multidisciplinary **Creative Technologist** working at the intersection of **AI, design, digital content, technology and business**. Experienced across creative agencies, jewellery brands, sports media, digital products and technology communities. I combine technical understanding with creative and strategic thinking to build digital experiences, content systems, AI-powered workflows and products. Created **700+ creative assets for 10+ clients**, led digital and AI initiatives for businesses, built AI-powered products, and led technology communities and events.

Experience

Tech Lead | Digital & AI, Aurora Jewel Studio

- Lead digital and technology initiatives spanning website development, internal systems, AI implementation, automation and digital strategy for a jewellery brand.
- Built a centralized internal management system to replace fragmented WhatsApp-based workflows and improve operational visibility.
- Developed **Aura AI**, an AI-powered jewellery stylist helping customers discover products based on occasion, preferences, gemstones and budget.
- Developed AI-assisted workflows for jewellery marketing, photorealistic product content and video production while maintaining strict product accuracy.

Content & Creative Designer, Humming Web, Australia

- Produced **700+ social-media creatives and reels** across 10+ client accounts spanning automotive, healthcare, finance, hospitality, retail and other sectors.
- Developed social campaigns, promotional creatives, carousels and visual concepts while maintaining brand consistency across diverse businesses.
- Applied AI-assisted workflows to accelerate creative ideation, visual development and content production at scale.
- Collaborated remotely with Australian marketing teams and clients to deliver high-volume content aligned with commercial and platform requirements.

Social Media Strategist & Content Designer, Twenty4Social / Aabhusan Crafts

- Develop social-media strategy, creative direction and visual content for Nepali jewellery brands across gold, silver and diamond categories.
- Create AI-assisted product photography concepts, campaign visuals and seasonal content for major Nepali festivals.
- Combine premium visual direction with local cultural context to develop brand and campaign content.

Digital Media | Photography & Videography, Ultra Trails Nepal

- Produce photography, videography, reels and social-media content for trail-running events and endurance-sports initiatives in Nepal.
- Cover race-day events and create documentary-style visual stories focused on athletes, communities and Nepal's trail-running culture.

Flutter Developer, Sero Finance

- Developed Flutter application features including OAuth authentication, JWT session management and multilingual support using a NestJS backend.
- Built voice-interaction and conversational UI features integrating speech-to-text and text-to-speech services.

Leadership

President, Tech Titans – IT Club

- Led the college technology community and coordinated workshops, hackathons, industry collaborations and student initiatives.
- Helped organize **Build Nepal Hackathon 2026**, bringing together 20 teams, 60+ participants and 8 mentors.
- Led technology-focused community initiatives and collaborations with external organizations to connect students with industry opportunities.

Selected Projects

DressMate – AI-Powered Digital Wardrobe

- Building an AI-powered digital wardrobe and outfit recommendation experience using **Flutter, FastAPI, PostgreSQL/Neon, Gemini/Gemma and Open-Meteo**.
- Responsible for backend and AI development, connecting recommendation logic, external APIs and the mobile product experience.

Project Netra – UNESCO Youth Hackathon 2025

- Built a full-stack AI-powered digital literacy platform using **Flutter, FastAPI, PostgreSQL and Google Gemini**.
- Developed an AI coaching simulator, deepfake image analyzer, gamified learning features and global leaderboard.

Mobile Product Design Portfolio

- Redesigned the QFX Cinemas mobile interface and conceptualized the Huba Nepal e-commerce clothing app.
- Developed high-fidelity product concepts using Figma, Canva and AI-assisted design workflows.
